

INNOVATIVE AND PROVEN SOLUTIONS FOR TODAY'S COMPLEX INFORMATION TECHNOLOGY MANAGEMENT AND SECURITY PROBLEMS

As an EAGLE FC 5 contract holder, we will help you implement and manage practical solutions to address your specific IT program management and information security program challenges.

CHALLENGE	SOLUTION
Effectively Managing Complex It Programs	<p>FEMA's Disaster Assistance Improvement Program (DAIP) is recognized as the gold standard for complex program management within DHS. We staff the PMO with personnel who successfully navigate the broad range of oversight and technical requirements presented by this high profile program coordinating the efforts of more than 18 Federal agencies.</p> <p>Transportation Security Administration's (TSA's) High Speed Connectivity (Hi-SOC) project brought network connectivity and supporting applications to over 400 US and International airport locations. We provided the quality and program management oversight for the implementation.</p>
FISMA Compliance and Executing an Effective Information Security Program	<p>TSA achieved the first "A" and 100%" on its FISMA scorecard within DHS. Our contribution to this included security policy and architecture, security engineering, security audit, and certification and accreditation.</p> <p>FEMA and USCG achieved "Green" on their FISMA scorecards. We provide Information System Security Officer Support Services for the Center for Domestic Preparedness (CDP) within FEMA and the Office of Information Assurance (CG-62) within the U.S. Coast Guard. We continue to manage over 100 systems for the U.S. Coast Guard.</p>

ENTERPRISE ACQUISITION GATEWAY FOR LEADING EDGE SOLUTIONS (EAGLE)

EAGLE is designed for ease-of-use, with no administrative fees applied by DHS, and allows DHS to acquire IT solutions across five functional categories. This IDIQ vehicle, with cost reimbursement, T&M, and FFP task orders was specifically designed to be the preferred source of IT services for DHS.

Functional Category 5 provides for a full range of business and technical management services that assist in the development, implementation, and continuous improvement of policies, procedures, guidelines, and directives. These services encompass all areas of IT policy and planning including, but not limited to:

- ENTERPRISE ARCHITECTURE
- SECURITY
- TRAINING
- ENTERPRISE RESOURCE MANAGEMENT
- BUSINESS PROCESS RE-ENGINEERING
- IT TRANSFORMATION AND STRATEGY
- ORGANIZATIONAL CHANGE LEADERSHIP
- ENTERPRISE AND PROGRAM MANAGEMENT OFFICE SUPPORT
